壹、依據

- 一、102年7月10日總統發布之「高級中等教育法」第43條中央主管機關應訂定高級中等學校課程綱要及其實施之有關規定，作為學校規劃及實施課程之依據；學校規劃課程並得結合社會資源充實教學活動。
- 二、110年3月15日教育部修正發布之「十二年國民基本教育課程綱要」。
- 三、110年6月11日教育部修正發布之高級中等學校課程規劃及實施要點。

貳、學校現況

一、班級數、學生數一覽表

| 等級名稱 | 群別名稱 | 科系名稱 | 第一學年 |     | 第二學年 |    | 第三學年 |    | 小計  |     |
|------|------|------|------|-----|------|----|------|----|-----|-----|
|      |      |      | 班級數  | 人數  | 班級數  | 人數 | 班級數  | 人數 | 班級數 | 人數  |
| 普通型  | 學術群  | 普通科  | 4    | 105 | 3    | 91 | 3    | 81 | 10  | 277 |
| 合計   |      |      | 4    | 105 | 3    | 91 | 3    | 81 | 10  | 277 |

二、核定科班一覽表

| 學校類型 | 群別  | 科班別 | 班級數 | 每班人數 |
|------|-----|-----|-----|------|
| 普通型  | 學術群 | 普通科 | 4   | 26   |
| 合計   |     |     | 4   | 104  |

三、體育班核定運動種類一覽表

## 參、學校願景與學生圖像

### 一、學校願景

#### ※學習型的學校、會思考的學生

重視學校本位發展，結合教師、家長、社區力量，經營並塑建發展多元智慧、尊重個別差異、促進適性發展的優質學習環境；並提供學生更紮實的知識基礎、更有利的潛能開發、更好的行為改變及更多自我實現的機會；以引導學生尊重自然與人性的尊嚴，追求人間的和諧關係，慎用科學與人文的專業知識，俾利培育出人文與科學、知識與能力、個性與群性均衡發展，有教養、會思考、展現多元、具備國際視野，求真、求善、求美、求仁的下一代。

### 學習型的學校 會思考的學生

求真、求善、求美、求仁

求真--會思考、追求真理、堅實的知識基礎。

求善--有教養、品格、倫理。

求美--美感教育，內心世界。

求仁--人文關懷，服務他人。

## 二、學生圖像

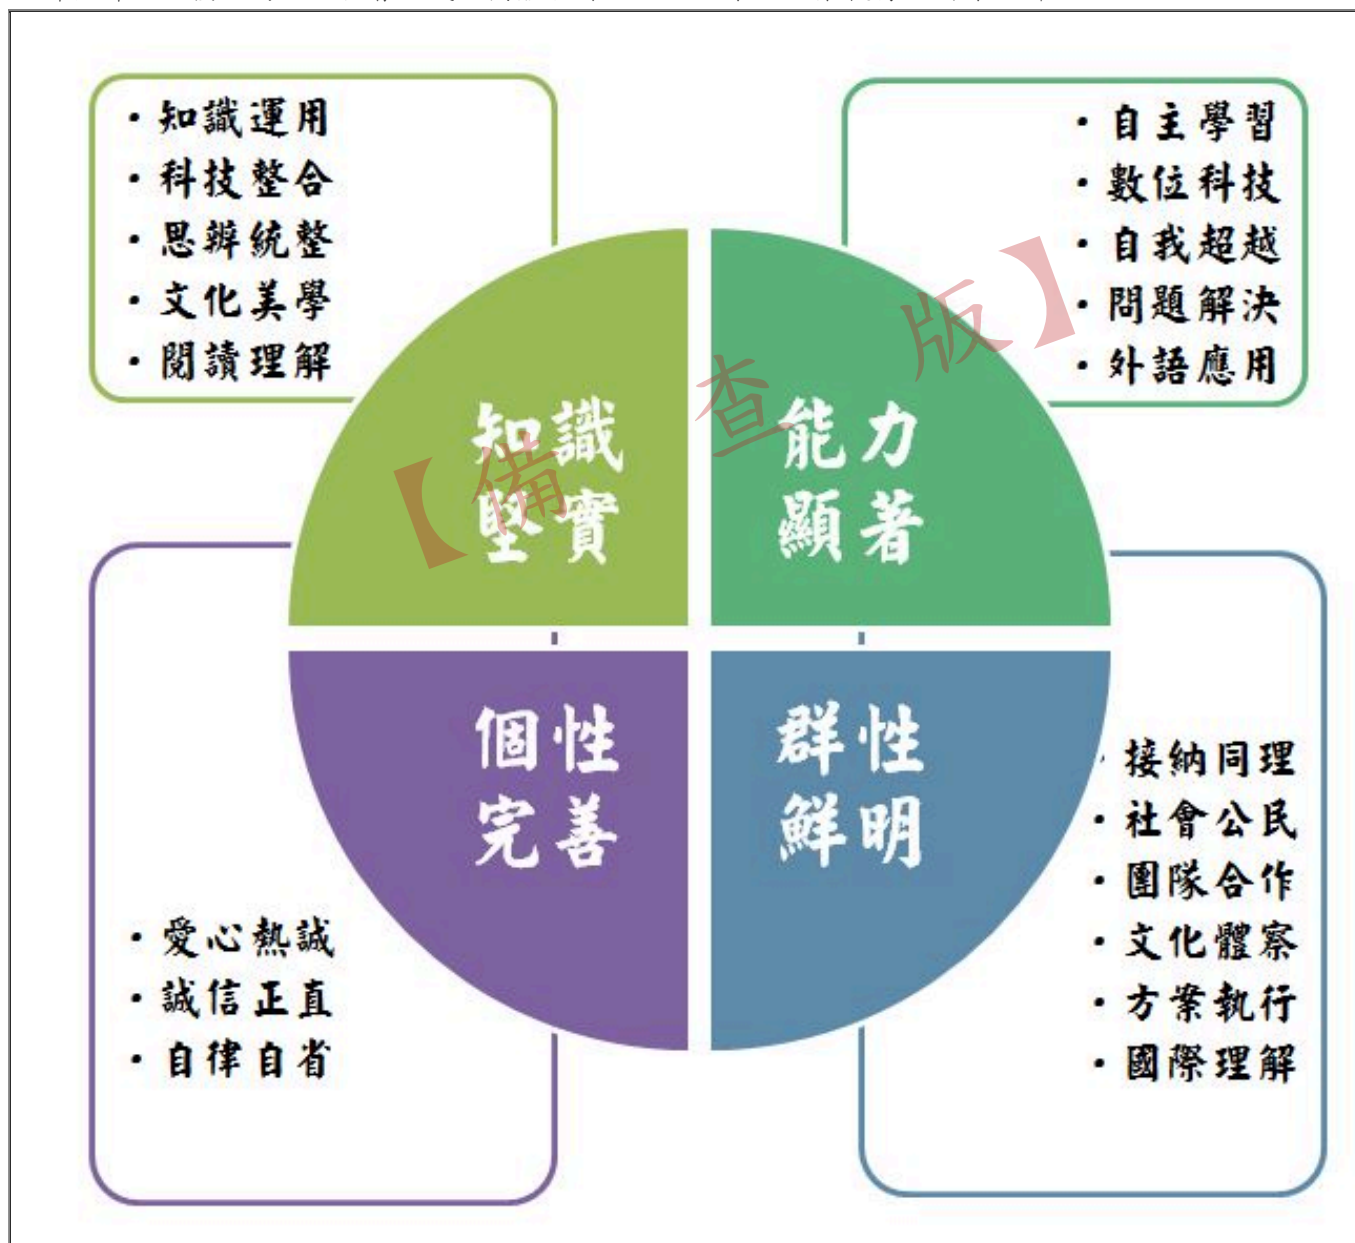

本校以「知識堅實、能力顯著、個性完善、群性鮮明-謙謙君子 大家閨秀」為學生圖像，以涵養品格與厚實學科能力基礎，實施各類適性多元課程與活動，精進學生專長與跨域實作能力，期使學生成為具備-菁英素養、創新探究、多元展能、愛群利他、國際視野的人才，並經校訓「誠、愛、熱、智」薰陶，具備誠心、愛心、熱心，以智慧通達事理，造福群己，成為正大光明的人群菁英與良好公民。

※1. 知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。

※2. 能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。

※3. 個性完善：愛心熱誠、誠信正直、自律自省。

※4. 群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。

臺北市私立靜心高中學生圖像及分項素養指標

| 校本<br>關鍵<br>素養 | 素養內涵     | 分項素養指標 |                                              |
|----------------|----------|--------|----------------------------------------------|
| 1<br>知識<br>堅實  | 1-1 知識運用 | 1-1-1  | 能由圖表、報告中解讀資料，判讀資料的意涵及因果邏輯關係，據以澄清或解答問題。       |
|                |          | 1-1-2  | 能辨識知識來源的可靠性及價值性，並尊重著作財產權，適切運用各類知識。           |
|                |          | 1-1-3  | 能針對所遇探究的問題，比較分析綜合歸納各類知識，擷取整合重組成為有意義的解決方案或報告。 |
|                | 1-2 科技整合 | 1-2-1  | 能有效運用資訊與個人知識，規劃具體可行方案                        |
|                |          | 1-2-2  | 能整合資源與自我要求，切實執行團隊方案                          |
|                |          | 1-2-3  | 具備宏觀視野，檢討省思方案效益                              |
|                | 1-3 思辨統整 | 1-3-1  | 能以問題解決方式，建立自己的思辨能力。                          |
|                |          | 1-3-2  | 具批判性思考，學會跨領域統整不同知識的能力                        |
|                |          | 1-3-3  | 能進一步激發社會關懷動機，產生實踐的動能                         |
|                | 1-4 文化美學 | 1-4-1  | 能經營布置美的環境                                    |
|                |          | 1-4-2  | 能觀察、分析、比較、判斷各項美的因素                           |
|                |          | 1-4-3  | 能尊重包容各文化中對美的不同觀點                             |
|                | 1-5 閱讀理解 | 1-5-1  | 能對閱讀的文章做文學性的探討及生活教育的延伸。                      |
|                |          | 1-5-2  | 具一般語文理解與運用能力外，能夠反思閱讀內容、建構意義、和對閱讀內容或形式進行批判。   |
|                |          | 1-5-3  | 能理解、運用、省思及投入文本，以達成個人目標，發展個人知識和潛能，並有效參與社會。    |

| 校本<br>關鍵<br>素養 | 素養內涵     | 分項素養指標 |                                                |
|----------------|----------|--------|------------------------------------------------|
| 2<br>能力<br>顯著  | 2-1 自主學習 | 2-1-1  | 具主動學習意願，自行決定研究問題，或提出解決及探索現況或問題。                |
|                |          | 2-2-2  | 具主動學習態度，自我監督與自我學習，不輕言放棄，以及和他人合作學習的態度。          |
|                |          | 2-2-3  | 具有效的主動學習方法與能力，擬定學習計畫，適切分配學習時間與學習內容，提昇學習效能。     |
|                | 2-2 數位科技 | 2-2-1  | 能適切並有效地運用數位科技於學習、工作與生活的能力與態度                   |
|                |          | 2-2-2  | 具數位科技技能、應用及運算思維、知識整合運用等能力                      |
|                |          | 2-2-3  | 能有效運用數位科技於學習，並使其成為積極自主學習、樂於實作、勇於創新求變、終身學習的數位公民 |
|                | 2-3 自我超越 | 2-3-1  | 具探索事務的興趣與熱忱，並養成主動學習的習慣。                        |
|                |          | 2-3-2  | 具主動學習、研究精神和批判性思維能力。                            |
|                |          | 2-3-3  | 能運用嚴謹分析、推理與歸納等科學方法，探究問題，以發現新的事實、理論或法則。         |
|                | 2-4 問題解決 | 2-4-1  | 能有效解決生活中的問題，或尋求諮詢以排除所遇之困難。                     |
|                |          | 2-4-2  | 具有主動思考問題解決策略的習慣，透過除錯使問題得以解決。                   |
|                |          | 2-4-3  | 能拆解問題，蒐集、重組運用可用資訊，使問題逐一被解決。                    |
|                | 2-5 外語應用 | 2-5-1  | 能以流暢適切的英語能力達成生活與學業中的交流與溝通。                     |
|                |          | 2-5-2  | 能分析訊息、整合資訊、合理規劃並發揮創意以完成任務。                     |
|                |          | 2-5-3  | 能以清楚的邏輯與思維，表達複雜的概念或見解。                         |

| 校本<br>關鍵<br>素養 | 素養內涵     | 分項素養指標 |                                    |
|----------------|----------|--------|------------------------------------|
| 3.<br>個性<br>完善 | 3-1 愛心熱誠 | 3-1-1  | 能用心追求人生崇高目的的領導者，具勤奮又有能力表現者。        |
|                |          | 3-1-2  | 能訂定明確的人生目標，具國際觀及多元智慧。              |
|                |          | 3-1-3  | 能擁有堅強的成功信念，懂得自我管理，推己及人，願意對人類做出貢獻。  |
|                | 3-2 誠信正直 | 3-2-1  | 能不輕易承諾，一旦做出承諾，必定不計代價，全力以赴。         |
|                |          | 3-2-2  | 能出於公心而敢於說真話和做得罪人的事，具備尊重且負責任的道德實踐者。 |
|                | 3-3 自律自省 | 3-3-1  | 能自律且追求健全生活方式，具備處事圓融且情緒管理能力者。       |
|                |          | 3-3-2  | 能成為終身學習並具備批判思考者。                   |

| 校本<br>關鍵<br>素養 | 素養內涵     | 分項素養指標 |                                              |
|----------------|----------|--------|----------------------------------------------|
| 4.<br>群性<br>鮮明 | 4-1 接納同理 | 4-1-1  | 了解自己的潛能與感受，心想並接納自己，探索與發展自我價值。                |
|                |          | 4-1-2  | 探索並肯定自我價值。                                   |
|                |          | 4-1-3  | 發展優勢能力，實踐自我。                                 |
|                |          | 4-1-4  | 展現自己的興趣與多元能力，接納自我，以促進個人成長。                   |
|                | 4-2 社會公民 | 4-2-1  | 具備公民意識與社會責任。                                 |
|                |          | 4-2-2  | 主動參與環境保育與社會公共事務。                             |
|                |          | 4-2-3  | 具備國際化視野，尊重多元文化，主動關心全球重大議題。                   |
|                |          | 4-2-4  | 落實社會服務的關懷行動，深化服務情懷。                          |
|                | 4-3 團隊合作 | 4-3-1  | 能遵守團隊規範，為爭取團隊榮譽而努力。                          |
|                |          | 4-3-2  | 能接納並尊重小組成員不同意見，必要時積極溝通與人合作，共同完成小組任務。         |
|                |          | 4-3-4  | 能針對問題，適時協助小組成員，不計較付出多寡，而以完成小組任務為先。           |
|                | 4-4 文化體察 | 4-4-1  | 能從多元文化觀點，瞭解並尊重不同的習俗與文化。                      |
|                |          | 4-4-2  | 能了解並應用國際社會之基本生活禮儀。                           |
|                |          | 4-4-3  | 能結合文化知識與語言能力，解決生活中的實際問題。                     |
|                | 4-5 方案執行 | 4-5-1  | 能熟悉規劃、分工、執行、檢討、修正、實施..等計畫執行步驟。               |
|                |          | 4-5-2  | 處理任務時，能妥善分工，規畫流程，有步驟的進行操作，並於期限內完成任務，並有具體成果。  |
|                |          | 4-5-3  | 處理任務能運用內外資源，創新思維，以明確策略及分工，掌握時效完成任務，解決生活中的問題。 |
|                | 4-6 國際理解 | 4-6-1  | 具備國際化視野，主動關心全球重大議題。                          |
|                |          | 4-6-2  | 能在國際場域或多元文化互動情境中溝通協調及團隊合作，並發展適切的人際互動關係。      |
|                |          | 4-6-3  | 具備國際公民意識與社會責任並採取行動以實踐之。                      |

## 肆、課程發展組織要點

### 臺北市私立靜心高級中學(高中部)課程發展委員會設置要點

#### 臺北市私立靜心高級中學(高中部)課程發展委員會設置要點

107.1.19 校務會議通過

109.1.17 校務會議修訂通過

- 一、 依據：103 年 11 月 28 日臺教授國部字第 1030135678A 號發布之「十二年國民基本教育課程綱要總綱實施要點」設置課程發展委員會(以下簡稱本會)，並訂定此要點。
- 二、 目標：
  - (一) 規劃、審議本校整體課程的實施模式與可行做法。
  - (二) 規劃、執行本校整體課程評鑑事宜。
  - (三) 結合社區資源，研議本校願景及課程發展特色。
  - (四) 建立教師發展、設計教學新課程的知能，增進教師專業自主能力。
- 三、 工作職責：
  - (一) 依照高級中學課程綱要總綱，並充分考量學校主客觀環境與條件、學生需求、家長期望等相關因素，結合全體教師和社會資源，規劃並執行學校總體課程發展策略。
  - (二) 審查各學科課程計畫及執行成果。
  - (三) 研訂各學科之課程計畫，發展學校課程總體計畫。
  - (四) 議決各科之教學時數。
  - (五) 議決應開設之選修課程。
  - (六) 議決各科課程改革提案。
  - (七) 審查本校重要活動、學年活動及班級活動。
  - (八) 審查教科書及教師自編教材。
  - (九) 執行、規劃課程評鑑事宜。
  - (十) 其他有關課程規劃與發展事宜。
- 四、 組織成員與架構：
  - (一)本會會議由校長任主任委員兼召集人，教務主任為執行秘書，委員共 21 人，均為無給職，任期 1 學年(自當年 8 月 1 日至次年 7 月 31 日止)，連選得連任，因職務為當然委員者隨職務之調動而更換之，補任委員任期至原任期期滿為止。成員組成方式如下：
    1. 學校行政代表：學務主任、輔導中心主任、國際中心主任、秘書、教學組長、圖資組長為當然委員，共 6 人。
    2. 特教老師：1 人。
    3. 家長代表：由家長會推派代表 1 人。
    4. 學科代表：國文與英文學科召集人及其他七大各領域召集人，包括：數學、自然、社會、藝術、健體、綜合、科技共 9 人。
    5. 專家學者代表：1 人由校長聘請之。
    6. 學生代表 1 人。
    7. 委員兼具多重身分者，僅能擇一種身分參加。
  - (二)本會組織架構：教務處主辦本會工作，相關處室協辦，並就任務需要進行分工，分工任務表如下：

| 組別           | 召集人        | 成員                       | 任 務 內 容                                                                                                                                                                                                                                                                                                                      |
|--------------|------------|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

五、 本會會議之召開：

- (一) 定期會議：每學期 2 次為原則。
- (二) 不定期會議：視需要召開。

六、 本會會議之決議：

- (一) 本會開會時須有應出席委員二分之一(含)以上之出席，方得開議。若需表決時，須有出席委員三分之二(含)以上同意，方得議決，投票採不記名投票或舉手方式行之。
- (二) 學校課程計畫審議應由課程發展委員會三分之二以上委員出席，二分之一以上出席委員通過，始得陳報各該主管機關。

七、 經課程發展委員會通過之議案，由校長交由有關單位執行。

八、 本要點經校務會議通過後實行，修正時亦同。

臺北市私立靜心高中 114 學年度課發會委員名單

| 序號 | 職稱           | 姓名  | 備註           |
|----|--------------|-----|--------------|

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 國文 4<br>英文 4<br>數學 4<br>歷史 1<br>地理 1<br>公民 2<br>本土語 1 ## 二、學校特色說明

1. 本校課程分社會人文、數理科技、醫藥生技及國際實驗四組課程，除部定必修之外，校定必修、加深加廣及多元選修、彈性學習及團體活動，整合為「生命探究」、「人文美學」、「數理科技」、「跨域創思」四大學程。
2. 校訂必修「探索體驗」課程，高一以海洋為主軸-「想望海洋及海洋之心」的大海課程；高二高三以海洋為主軸-「無痕山林、大山之歌、走向群山及山的禮物」的大山課程；經由實作(實驗)及探索體驗，培養學生正向思考、勇於承擔、團隊合作、問題解決及自律自省的能力與素養。
3. 生命探究學程：包含「國文、社會、綜合、健體領域」加深加廣及多元選修課程。
  - 〈1〉加深加廣選修：綜合、健體及社會領域加深加廣選修。
  - 〈2〉多元選修〈社會人文、醫藥生技及國際實驗共同開設〉：以「史記專題探究、紅樓夢專題探究」等課程，讓學生能藉由前人經驗智慧，建立自我人格、智慧、才識。
4. 人文美學學程：包含國文、英文、社會及藝術領域加深加廣選修及多元選修課程。
  - 〈1〉國文、英文、社會及藝術領域課程及加深加廣選修。
  - 〈2〉多元選修課程〈社會人文、數理科技、醫藥生技及國際實驗四組共同開設〉：第二外語〈法語、德語、西班牙語、日語〉、創作性舞蹈、經典電影賞析與創作、英文新聞臺、城市歷程的記憶、教室中的元社會、傳播學的想像等課程，培育學生跨領域閱讀、外語學習與寫作，厚植人文涵養及創造表達能力。
  - 〈3〉多元選修〈社會人文組〉：透過「視覺與環境設計」課程完成環境視覺的創意手法和實踐操作技能的學習。
  - 〈4〉本學程希望透過課程設計、教學安排、活動實踐，樹立學生追求真理的崇高理想，培養學生善良仁德的高尚品德，陶冶學生優美從容的高雅情操，以營建靜心學子真善美的正向人生。
5. 數理科技學程：包含數學、自然及科技領域加深加廣選修及多元選修課程。
  - 〈1〉科技領域：透過部定必修-「資訊科技與生活科技課程」，提昇高中學生基本科技能力與素養，加深加廣選修開設高一「機器人專題、工程設計專題」提供學生學習試探，高二及高三開設「進階程式設計及科技應用專題」等多元選修課程提供資訊科技學群學生深化學習，高三社會人文、數理科技及醫藥生技三組都開設「物聯網入門」多元選修，提供學生依適性學群，運用高中所學及知識整合能力進行專題。
  - 〈2〉數學領域：社會人文開設「財經法律與實務」等多元選修課程，提供學生數理化、資訊及財經商管學群未來學習基礎能力。另外，數理科技組及醫藥生技組開設「微積分及線性代數」等多元選修，提供自然學群同學具備紮實數學學術探究基礎數學能力。
  - 〈3〉自然領域：高一開設「科學論文寫作概論」等課程，培養學生撰寫研究計畫及論文研究之能力。高二數理科技組及醫藥生技組都開設「化學彩色王國、化學探秘」等多元選修課程，提供學生通識性課程、實作實驗課程跨領域統整性課程之試探性學習。另外，開設「色彩繽紛的光學、電子學原理與實驗、未來領袖的科學課、物理辯論、電影與文學中的生命科學、半導體原理與製造概論」等多元選修，提供自然學群同學學到大學學術研究所需之具備相關基礎學科知識與能力。
  - 〈4〉數理科技及醫藥生技學程開設大學銜接適性選修課程，以多元的教學活動如跨境課程、專題探究、小組競賽、參觀教學、體驗探究活動、實體操作、專題發表、專家演講等方式，充分發展學生潛能，同時豐富學生數學、自然、科技學習歷程。
6. 跨域創思學程：
  - 〈1〉開設跨領域多元選修課程-「桌遊漫遊與創作、英文新聞編採、生醫工程概論、航太工程概論、財經理論、教室中的元社會」等提供學生整合不同領域的學習，藉以拓展學生視野進而創新思維。
  - 〈2〉多元選修〈社會人文組〉：「走遊世界」課程，深化人文學科素養。
7. 彈性學習時間：高一每週2節，高二每週3節、高三每週2節。共計14節。
  - 〈1〉充實課程「專題小論文」：高一、二開設，每週1節，由學生自主選擇與未來學群相關研究專題，進行小論文的報告撰寫與發表。
  - 〈2〉自主學習：高一、二開設，共9週每週2節，供學生自訂主題及計畫進行學習。培育具備主體學習、深入探究、思考判斷、多元開展的學生。
  - 〈3〉校隊培訓：高一、二開設，共6週每週2節，提供學生持續精進個人專長興趣，並在專長教師指導下，為各項競賽作準備。
  - 〈4〉高一、二藉「學校特色活動」如學習博覽會、境外學習等活動，提供學生多元展示舞臺、多元學習環境與刺激，拓展學生多元能力，成就每一位學生。
  - 〈5〉高三：依班群開設充實課程「生涯大師」，協助學生大學院系探索、國內外升學輔導、職業環境與學群瞭解等，以配合自身優勢能力、生涯興趣及工作價值觀，建構生涯藍圖。
8. 社會人文班群課程說明：  
加深加廣選修：開設語文、社會領域各科部定加深加廣課程，深化大學相關學群學系所需學科基礎知識，並協助學生具備參加分科測驗紮實學科基礎，協助銜接未來大學升學進路。
9. 數理科技及醫藥生技班群課程說明：  
加深加廣選修：開設數學、自然、科技領域各科部定加深加廣課程，深化大學相關學群學系所需學科基礎知識，並協助學生具備參加分科測驗紮實學科基礎，協助銜接未來大學升學進路。
10. 外語相關課程：

依各學年段學生語文能力與發展特質，自編英語文教材、規畫適性英語教學課程與活動，並透過各類課堂活動、展演競賽以及海外文化交流，紮根英語文基礎與溝通能力的培養；另開設第二外語課程，涵養學生尊重多元文化的態度，具備國際視野。

11. 依各學年段學生身心發展特質，設計規畫適性音樂教學與活動，紮根音樂基礎與樂器專長能力培養，並透過社團活動、校隊培訓及國內外音樂交流，涵養有教養、具美感的靜心人。

12. 專長培育課程：本校中小學向來重視學生一人一專長，落實社團及專長培育為學校辦學特色，向來深獲家長肯定，高中部將秉持一貫辦學理念延續學生專長〈學藝、才藝、跨域能力等〉之培育，實屬學校特色課程重要之一環。

| 課程名稱： | 中文名稱：自然科學探究與實作課程A                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                       |
|       | 英文名稱：Natural Sciences: Inquiry and Practice A                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                       |
| 授課年段： | 二上、二下                                                                                                                                                                                                                                                                                                                         | 學分總數：2                                                                                                                                                                                                |
| 課程屬性： | 改變與穩定、科學與生活                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                       |
| 師資來源： | 跨科目：物理、地球科學                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                       |
|       | 跨科協同                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                       |
| 學習目標： | <p>(一) 藉由物理力學及地震學兩大主題為主軸，讓學生可經由「物理、地球科學」兩大領域視野，對於自然科學有更深入的了解。</p> <p>(二) 藉由PBL(問題導向學習法)，培養學生科學思考的能力，目標有：(1)利用生活經驗或實境案例引導學生提出問題(2)學生能經由閱讀與資料搜尋，並能夠彙整資訊(3)將概念連結實作，讓學生能夠設計解決問題的方法，培養實驗技巧(4)導入分析技術，將所得到的實驗結果做統整、分析。</p> <p>(三) 經由學生實作過程，讓學生融入課程，並手動改變模組設計，並和理論作協同的溝通，並上台報告數據及分析方法</p> <p>(四) 經由小組合作與討論、表達與分享達到同儕互相學習，激發學生創造力。</p> |                                                                                                                                                                                                       |
| 教學大綱： | 單元/主題                                                                                                                                                                                                                                                                                                                         | 內容綱要                                                                                                                                                                                                  |
|       | 一 導論                                                                                                                                                                                                                                                                                                                          | 教學內容、上課方式、評分標準、分組、科學概念介紹                                                                                                                                                                              |
|       | 二 引導式探究(guided inquiry) 震有遲(一)                                                                                                                                                                                                                                                                                                | <p>【發現問題-觀察現象】</p> <p>播放紀錄片(921地震)片段內容，讓學生提出所看到的現象。</p> <p>【發現問題-蒐集資料】</p> <p>讓學生討論與觀察:當地震發生時，怎樣的房屋結構比較穩固，不易倒塌?</p> <p>【發現問題-形成或訂定問題】</p> <p>根據學生所討論及觀察到的現象，整合出什麼樣的房屋架構耐震度比較好?</p> <p>並建構出可驗證的觀點。</p> |
|       | 三 引導式探究(guided inquiry) 震有遲(二)                                                                                                                                                                                                                                                                                                | <p>【規畫與研究-尋找變因或條件】</p> <p>學生經過上述討論後，請學生確認在接下來的實驗過程中的 控制變因及操縱變因。</p> <p>【規畫與研究-擬定研究計畫】</p> <p>依各組所列出的操縱變因，來規劃適當實驗方法與流程，並以流程圖的方式繪製在學習單上；繪製內容需包含在實驗中建造房屋模型所需要的木條數、樓層數、底板大小、橡皮筋條數、砝碼重量、A4紙。</p>           |
|       | 四 引導式探究(guided inquiry) 震有遲(三)                                                                                                                                                                                                                                                                                                | <p>【規畫與研究-收集資料數據】</p> <p>1. 請學生依據之前所規劃的實驗步驟，進行耐震房屋建造。</p> <p>2. 並於建造完成後，將房屋模型放於搖搖機台上進行耐震實驗操作(放置前需先記錄房屋模型的重量)，在模型樓層加載砝碼及A4紙。</p> <p>3. 以各種不同震度進行測試，震幅由小逐漸加大，直到房屋模型崩塌為止，記錄實驗操作過程中的各項實驗數據。</p>           |
|       | 五 引導式探究(guided inquiry) 震有遲(四)                                                                                                                                                                                                                                                                                                | <p>【論證與建模-分析資料與呈現數據】</p> <p>1. 學生能練習使用資訊與數學等方法，有效整理資料數據，進而轉換成合適圖表。</p> <p>2. 學生能依據物理及地球科學的背景知識由圖表中分析、討論出變因(木條數、樓層數、底板大</p>                                                                            |

|    |                                      |                                                                                                                                   |
|----|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
|    |                                      | 小、橡皮筋條數、砝碼重量…)如何影響結果(房屋倒塌時間的長短……)。                                                                                                |
| 六  | 引導式探究 (guided inquiry) 震<br>震有遲(五)   | 【論證與建模-解釋與推理】<br>依據上述資料與數據分析的結果，學生能夠合理推論出何種房屋模型耐震度最佳。                                                                             |
| 七  | 引導式探究 (guided inquiry) 震<br>震有遲(六)   | 【表達與分享-表達與溝通】<br>請各組學生依據組別順序，依序上台以適當的口語、文字、圖像、影音或實物等表達方式發表自己組別的探究過程與實驗結果，並聽取其他組別的探究過程與實驗結果。                                       |
| 八  | 結構式探究 (structured inquiry) 平面駐波現象的觀察 | 【發現問題-觀察和假說】<br>1. 複習物理實驗中應觀察的重點：結構、行為、物理概念。<br>2. 觀察水波槽駐波的現象，找尋有趣的物理現象，並提出問題與假說。<br>3. 以老師提供的問題為例，說明應如何觀察，並量化說明物理現象。             |
| 九  | 引導式探究 (guided inquiry) 雙<br>狹縫繞射實驗   | 【規劃與研究-進行實驗並獲取數據】<br>【論證與建模-解釋與推理】<br>1. 提供可探究的實驗問題：雙狹縫干涉實驗。<br>2. 尋找繞射圖案(亮紋間距)與各項操縱變因間的量化關係，學生應利用其量測的數據進行量化說明。                   |
| 十  | 開放式探究 (open-inquiry) 主題<br>式探究(一)    | 進行期末報告分組，並提供範本試題集讓學生參考。<br>【發現問題-觀察現象並提出假說】<br>1. 以波動為主題，讓學生根據此物理原理尋找相關現象，觀察後，提出現象觀察，並提出欲探討的問題。<br>2. 學生探討的問題為：操縱變因與應變變因之間的關係是甚麼？ |
| 十一 | 開放式探究 (open-inquiry) 主題<br>式探究(二)    | 【規劃與研究-擬定研究計畫】<br>1. 第一次試做實驗，觀察物理量之間應有何種變化趨勢。<br>2. 設計實驗裝置，裝置包含控制變因、實驗步驟、量測方法與實驗裝置+量測儀器簡圖。<br>3. 製作研究計畫投影片，向全班說明實驗規劃。             |
| 十二 | 開放式探究 (open-inquiry) 主題<br>式探究(三)    | 【表達與分享】<br>1. 分享上週的實驗規劃投影片，同學與老師給予回饋與改進建議。<br>【規畫與研究-收集資料數據】<br>1. 依據修改後的實驗裝置，開始進行實驗並獲取數據。                                        |
| 十三 | 開放式探究 (open-inquiry) 主題<br>式探究(四)    | 【論證與建模-分析資料與呈現數據】<br>1. 學生使用tracker、imagej、audacity等軟體，將實驗數據量化後，以excel、ggb將實驗數據製作成圖表。                                             |
| 十四 | 開放式探究 (open-inquiry) 主題<br>式探究(五)    | 【論證與建模-解釋與推理】<br>1. 學生透過資料查找、文獻閱讀，將實驗數據的物理意義說明，並解釋其中偏差的來源可能為何。<br>2. 製作實驗結果投影片，包含：現象影音檔、研究問題、實驗裝置、實驗數據圖表、物理原理與解釋數據、結果與偏差討論。       |
| 十五 | 開放式探究 (open-inquiry) 主題<br>式探究(六)    | 【表達與分享-表達與溝通】<br>安排各組對研究計畫之執行成果進行輪流報告，老師對各組報告的實驗細節進行提問，以期增進學生之溝通表達能力                                                              |

|       |                                                                                                                           |                             |                                                                                                                                                                    |
|-------|---------------------------------------------------------------------------------------------------------------------------|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       |                                                                                                                           |                             | 【表達與分享-評價與省思】<br>並以互評表單機制邀請學生互相觀摩，並對各自主題提出具體建議及評語。                                                                                                                 |
|       | 十六                                                                                                                        | 開放式探究（open-inquiry）主題式探究(七) | 【綜合能力訓練】<br>1. 說明科學小論文的六大架構：前言、文獻探討、研究方法、研究結果與討論、結論與未來展望、參考文獻，以及六大架構內應具備的內容<br>2. 根據同學與老師的回饋，學生針對實驗現象不足以說明清楚的部分，補充實驗設計與數據。<br>3. 結合新舊數據，完成完整版的實驗結果投影片，並製作成紙本科學小論文。 |
|       | 十七                                                                                                                        | 開放式探究（open-inquiry）主題式探究(八) | 【表達與分享-表達與溝通】<br>1. 各組根據修改後的紙本科學小論文上台報告。                                                                                                                           |
|       | 十八                                                                                                                        | 期末題庫班                       | 【綜合能力訓練】<br>1. 老師以歷屆試題，進行探究與實作的試題分析，並藉此複習探究與實作的四大能力。<br>2. 各組分配試題，解答完題目後，上台講解給他組同學。                                                                                |
|       | 十九                                                                                                                        |                             |                                                                                                                                                                    |
|       | 二十                                                                                                                        |                             |                                                                                                                                                                    |
|       | 二十一                                                                                                                       |                             |                                                                                                                                                                    |
|       | 二十二                                                                                                                       |                             |                                                                                                                                                                    |
| 學習評量： | 1. 基本知識的紙筆測驗(包含物理、地球科學概念)：10%<br>2. 實驗過程的態度(問題發想、實驗設計操作)：30%<br>3. 各主題小組報告(實驗數據整理、實驗口頭報告)：40%<br>4. 期末心得報告(包含互評表、自評表)：20% |                             |                                                                                                                                                                    |

|       | 跨科協同                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                             |
| 學習目標： | <p>1. 藉由「植物世界面面觀」為主軸，設計一個引導式探究及兩個開放式探究，讓學生可由化學、生物兩大領域視野，對於自然科學有更深入的了解，並與生活情境結合，了解到科學與生活之間是息息相關的。</p> <p>2. 經由探究式教學模式，培養學生對於科學能夠採取多面向的思考。包括：</p> <p>(1)發現問題：學生能主動或經由引導提出問題。</p> <p>(2)規劃研究：設計解決問題方法、設計實驗步驟，包括操作變因、控制變因等。經由學生實作過程，讓學生真正融入真實課程內容，真正落實理論與實際並用。</p> <p>(3)論證建模：能根據數據進行分析與推論，並能提出結論、建立模型。</p> <p>(4)表達分享：經由彼此合作、表達與分享達到同儕互相學習，激發學生創造力、回饋及反思。</p> |                                                                                                                                                                                                                                                                                                                             |
| 教學大綱： |                                                                                                                                                                                                                                                                                                                                                            | 單元/主題                                                                                                                                                                                                                                                                                                                       |
|       | 一                                                                                                                                                                                                                                                                                                                                                          | <p>引導式探究 (guided inquiry) 天然植物色素的神奇魔法-多彩的的植物色素(一)</p> <p>【發現問題-觀察現象】<br/>準備各式不同顏色的蔬果，請學生歸納出有哪些顏色。</p> <p>【發現問題-蒐集資料】<br/>請學生討論蔬果組織細胞中存在哪些物質，才會呈現多樣化的顏色。這些物質存在於細胞的何處，若想要取得這些物質，可能需要的步驟有哪些。</p> <p>【發現問題-形成或訂定問題】<br/>讓學生根據之前的討論，整合出天然物質中是哪些成分會在不同條件下呈現不一樣的顏色，以及這些物質的特性。</p>                                                  |
|       | 二                                                                                                                                                                                                                                                                                                                                                          | <p>引導式探究 (guided inquiry) 天然植物色素的神奇魔法-多彩的的植物色素(二)</p> <p>【規畫與研究-尋找變因或條件】<br/>老師於課堂上展示漸層飲料。請學生思考製作一個具備多種顏色的彩色分層水，需要注意什麼？由上面的討論後，請學生確認在接下來的實驗過程中的控制變因、操縱變因。</p> <p>【規畫與研究-擬定研究計畫】<br/>學生於漸層飲料的示範中可能歸納出密度與溫度會影響分層，因此請學生構思，如何以植化素取代人工色素，製作出一杯分層飲料。依各組所列出的操縱變因，來規劃適當實驗方法與流程，並以圖示流程圖的方式繪製在學習單上。</p> <p>需含兩個實驗步驟：一、萃取。二、彩色分層水。</p> |
|       | 三                                                                                                                                                                                                                                                                                                                                                          | <p>引導式探究 (guided inquiry) 天然植物色素的神奇魔法-多彩的的植物色素(三)</p> <p>【規畫與研究-收集資料數據】<br/>請學生依據之前所規劃的實驗步驟，進行實驗操作。並記錄其操作過程中的實驗數據。</p>                                                                                                                                                                                                      |
|       | 四                                                                                                                                                                                                                                                                                                                                                          | <p>引導式探究 (guided inquiry) 天然植物色素的神奇魔法-多彩的的植物色素(四)</p> <p>【表達與分享-表達與溝通】<br/>請學生上台發表他們所設計的實驗流程圖。(包含要萃取的天然物質、實驗器材、實驗步驟簡述)</p>                                                                                                                                                                                                  |

內容綱要

為什麼學歷史？

1. 請學生談談對文明、文化的初步認識？如何定義？
2. 導入為何要學歷史

什麼是史料？

1. 以歷史學中的文明、文化資料、評論、報導、影片紀錄等當作例子，說明什麼是史料？

什麼是史料？

1. 舉世界各大文明、文化中的資料、評論、報導、影片紀錄等當作例子，說明什麼是史料？

歷史事實如何建構？從文章導讀中讓學生可以瞭解與分析

1. 何為歷史事實？
2. 歷史如何被建構？

歷史事實如何建構？

1. 世界的文明如何交會，探討歷史事實如何

以節錄一段文本、影片，分組討論與分析引導學生發現問題

1. 主題應該具有一定的歷史背景和潛在的問題，
2. 明確界定他們想要研究的問題或主題
3. 研究問題相關的資料確保資料的來源正確
4. 建立自己的研究框架和理解問題的背景

歷史著作、史料選讀、史料分析

1. 選讀文明、文化的交會、會有哪些交流情形等相關代表性著作導讀
2. 如何進行史料分析？
3. 分析這些文明、文化對人類歷史產生哪些衝擊

何為「歷史寫作」？

1. 研究計畫書的撰寫  
介紹史學研究的相關程序，說明史學研究的原則與方法，分析史學研究的基本範式。  
「歷史寫作」的方法說明
2. 問題設定
3. 資料查詢
4. 聚焦資料與內容推論

實作：小論文撰寫

請學生在〈十八個地理座標看世界史：從文明發源、民族、政治、軍事和帝國，到殖民、貿易和全球化，探討各地的發展與交流歷程〉的主題下，依先前「歷史寫作」的方式，書寫小論文

Discuss the role of community in both the poem and the novel, then construct a thesis exploring how Achebe depicts the tension between individual desires and communal obligations.</p> <p>Close read MOCK stimulus materials. Identify purpose, arguments, and evidence related to themes of colonialism, cultural identity, and change. Write summary responses.</p> |
| 七 | Unit 3: Things Fall Apart  | <p>Develop a research question based on the themes of cultural conflict, identity, or ambition in Things Fall Apart. Use the stimulus texts to support arguments. Conduct research using peer-reviewed sources and create an annotated bibliography.</p> <p>Review research skills with a focus on credibility, bias, and perspectives. Use the QFT process to refine research questions.</p> <p>Draft and peer review the Individual Written Argument (IWA) on a theme from Things Fall Apart. Plan, present, and self-critique the presentations. Practice the oral defense, focusing on cultural conflicts and thematic analysis.</p>                |
| 八 | Unit 4: Performance Task 1 | <p>Students form teams of 3-5 and begin brainstorming potential real-world problems or academic issues to investigate.</p> <p>Teams develop a clear, focused research question, dividing responsibilities based on different lenses or approaches. Each team member investigates their assigned approach, gathering credible sources and synthesizing information relevant to their lens.</p> <p>Students compile an annotated bibliography of sources that will be shared with their team.</p>                                                                                                                                                         |
| 九 | Unit 4: Performance Task 1 | <p>Teach students how to structure their 1200-word IRR based on their specific lens and the AP Seminar rubric.</p> <p>Students begin writing their IRR, focusing on synthesizing sources and presenting a coherent argument.</p> <p>Students participate in peer review sessions within their teams, providing feedback on each other’s reports for clarity, evidence use, and coherence.</p> <p>Students revise their IRRs based on peer</p>                                                                                                                                                                                                           |

|    |                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    |                            | <p>and teacher feedback, ensuring their approach aligns with the team's overall goal.</p> <p>Teams collaborate to integrate individual research into a cohesive 8-10 minute multimedia presentation, focusing on argument structure and supporting evidence.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 十  | Unit 4: Performance Task 1 | <p>Teams practice their presentations, receiving feedback from peers and the teacher on their delivery and the strength of their argument.</p> <p>Teams present their multimedia presentations and respond to questions during the oral defense, addressing limitations, implications, and different perspectives.</p> <p>Teams and individuals reflect on the process, discussing strengths, areas for improvement, and what they learned about collaboration and research.</p>                                                                                                                                                                                                                                          |
| 十一 | Unit 5: Performance Task 2 | <p>Introduce the three components: IWA, multimedia presentation, and oral defense. Discuss expectations and timeline. Review and analyze the College Board-provided stimulus materials. Begin discussing the central theme and perspectives.</p> <p>Use the QFT (Question Formulation Technique) process to help students develop a research question prompted by the stimulus material.</p> <p>Teach students how to use digital databases, focusing on finding scholarly, peer-reviewed sources. Review credibility, relevance, and bias (RAVEN method). Students begin gathering sources representing various perspectives that will support their research question. Create a preliminary annotated bibliography.</p> |
| 十二 | Unit 5: Performance Task 2 | <p>Students continue gathering additional sources, refining their research focus based on teacher feedback.</p> <p>Complete an annotated bibliography with at least 5 scholarly sources and the stimulus material, explaining how each source contributes to their research question. Teach students how to structure a 2000-word research argument, including an introduction, opposing views, resolutions, conclusions, and solutions.</p> <p>Students create detailed outlines for their IWA, organizing key points, evidence, and counterarguments.</p>                                                                                                                                                               |
| 十三 | Unit 5: Performance Task 2 | <p>Students begin writing the first draft of their IWA, ensuring they synthesize sources effectively and support their argument with a range of evidence. Emphasize the importance of presenting a</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|    |                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|    |                                                              | <p>coherent and convincing argument, addressing counter arguments, and considering implications.</p> <p>Students participate in peer review sessions, providing constructive feedback on the clarity of arguments, evidence use, and structure.</p> <p>Students revise their IWAs based on peer and teacher feedback, focusing on clarity, argument strength, and integration of sources.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 十四 | Unit 5: Performance Task 2                                   | <p>Teach students how to create a 6-8 minute multimedia presentation. Focus on audience engagement strategies, visual media integration, and clarity of argument.</p> <p>Students begin drafting slides and practicing their presentations, receiving feedback from peers.</p> <p>Students finalize their multimedia presentations, rehearsing in front of the class or small groups. They also prepare for potential oral defense questions.</p> <p>Teach students how to effectively answer oral defense questions, focusing on defending their research process and argument.</p>                                                                                                                                                                                                                                                        |
| 十五 | Unit 5: Performance Task 2 Unit 6: End of Course Exam        | <p>Students deliver their 6-8 minute multimedia presentations and respond to two oral defense questions from the teacher.</p> <p>Students reflect on their performance, the research process, and their overall understanding of the project, discussing strengths and areas for improvement.</p> <p>Review the format of Part A, where students analyze an argument using evidence. Discuss key components such as identifying the claim, evaluating evidence, reasoning, and identifying rhetorical strategies.</p> <p>Students practice with sample texts, focusing on breaking down arguments and identifying strengths/weaknesses in reasoning and evidence.</p> <p>Conduct a timed practice session where students analyze an argument and write their response under exam conditions.</p> <p>Provide feedback on their analysis.</p> |
| 十六 | Unit 6: End of Course Exam Unit 7: Narrative Writing Project | <p>Review the format of Part B, where students must build their own argument using at least two of four provided sources. Discuss how to synthesize sources, identify perspectives, and create a coherent argument.</p> <p>Practice synthesizing arguments from multiple perspectives using sample sources. Focus on how to select relevant evidence and address counterarguments.</p> <p>Conduct a mock exam that includes both Part A and Part B. Review responses and</p>                                                                                                                                                                                                                                                                                                                                                                |

|     |                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                   | <p>provide targeted feedback to ensure students are ready for the exam.</p> <p>Begin by reading "How to Tell a Story" by Daniel McDermott (New York Times). Discuss key takeaways about storytelling techniques and narrative structure.</p> <p>Provide background of <i>Catcher in the Rye</i> and its themes of curiosity, identity, and personal growth. Begin reading the first few chapters, focusing on Holden Caulfield's voice and perspective.</p> <p>Introduce the narrative prompt (a moment of curiosity). Provide time for students to brainstorm and outline their personal narrative.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 十七  | Unit 7: Narrative Writing Project | <p>Students begin drafting their narrative about a moment of curiosity, focusing on developing voice, pacing, and character. Assign further reading, discussing Holden's curiosity and inner struggles with societal expectations and personal meaning. Students reflect on how these themes can relate to their own experiences.</p> <p>Students participate in peer review, focusing on narrative clarity, voice, and emotional resonance. Begin revisions based on feedback.</p> <p>Discuss Holden's development throughout <i>The Catcher in the Rye</i>, especially his internal conflict and how curiosity about adulthood shapes his actions. Compare this with the students' own narratives.</p> <p>Students begin drafting their narrative about a moment of curiosity, focusing on developing voice, pacing, and character. Assign further reading, discussing Holden's curiosity and inner struggles with societal expectations and personal meaning. Students reflect on how these themes can relate to their own experiences.</p> <p>Students participate in peer</p> |
| 十八  | Unit 7: Narrative Writing Project | <p>Teach students techniques for presenting their narratives (tone, expression, pacing). Students plan and rehearse their dramatic readings.</p> <p>Finish the novel and discuss the overall impact of Holden's journey. Focus on how Salinger uses voice to convey Holden's unique perspective and how curiosity influences his decisions.</p> <p>Students deliver their dramatic readings, focusing on engaging the audience and bringing out the emotional core of their stories.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 十  | Unit 1: Kinematics Review Week     | Unit 1: Kinematics Review Week                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 十一 | Forces and Newton's Laws of Motion | Describe a force as an interaction between 2 objects and identify the interacting objects for any force.<br>Distinguish long-range and contact forces.<br>Apply Newton's three laws of motion to predict and explain the motion of objects.<br>Distinguish between force diagrams and free-body diagrams.                                                                                                                                                                    |
| 十二 | Forces and Newton's Laws of Motion | Recognize and identify the forces acting on an object; construct force and free-body diagrams.<br>Articulate the connection between force and motion.<br>Identify Action/Reaction pairs of forces on interacting objects.                                                                                                                                                                                                                                                    |
| 十三 | Applying Newton's Laws: Part 1     | Distinguish between static and dynamic equilibrium and solve dynamics problems for an object in equilibrium.<br>Describe the relationship between friction and the normal force.<br>Explain the microscopic causes of friction.<br>Use free-body diagrams and Newton's second law to solve dynamics problems.                                                                                                                                                                |
| 十四 | Applying Newton's Laws: Part 1     | Solve problems involving sliding, rolling and static friction.<br>Recognize the distinctions among mass, weight, and inertia.<br>Distinguish inertial and gravitational mass.<br>Explain "apparent weight" and solve for an object's apparent weight.                                                                                                                                                                                                                        |
| 十五 | Applying Newton's Laws: Part 2     | Discuss the factors that affect air resistance and understand how and why a falling object reaches terminal velocity.<br>Use Newton's third law to identify forces and to solve "coupled mass" problems where two or more objects interact.<br>Describe the properties of tension in a rope, string or cable.<br>Solve problems involving ropes and pulleys.                                                                                                                 |
| 十六 | Uniform Circular Motion            | Calculate period, frequency and speed for objects in circular motion.<br>Identify the direction of velocity, acceleration and net force for objects in circular motion.<br>Use Newton's laws to solve dynamics problems for objects in uniform circular motion.<br>Solve for the minimum or maximum speed at which an object can move and still maintain its circular path for various scenarios.<br>Solve for the apparent weight of an object moving in a vertical circle. |
| 十七 | Gravity and Orbits                 | Use Newton's law of gravity to describe and calculate the gravitational force that                                                                                                                                                                                                                                                                                                                                                                                           |

|     |                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                        | <p>two objects.<br/>Use the law of universal gravitation to analyze the circular orbits of satellites and planets.<br/>Derive the expression for the critical speed of a satellite using Newton's second law and the law of gravity.<br/>Explain what is meant by a gravitational field and calculate gravitational force from the field vector.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 十八  | Unit 2: Review and Exam Week           | Unit 2: Review and Exam Week                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 十九  | Introduction to Energy                 | <p>Explain what it means for a quantity to be conserved.<br/>Understand the basic energy model, including conservation of energy, energy transformations within a system and energy transfers between a system and the environment.<br/>Identify the forms of energy that are important in mechanical motion and describe energy transformations that take place in a variety of scenarios.<br/>Articulate the connection between thermal energy and the microscopic kinetic and potential energies of the particles in an object.<br/>Explain the relationship between work and the energy transferred to and from a system.<br/>Describe the conditions that must be met for work to be done on an object, distinguish positive and negative work and calculate the work done by a force.</p> |
| 二十  | Potential Energy & Conservative Forces | <p>Distinguish conservative and non-conservative forces and describe the properties of each.<br/>Use the definition of work to show that the work done by a conservative force is independent of path.<br/>Explain the meaning of potential energy and how conservative interactions (such as those described by the gravitational and spring force) give rise to changes in potential energy.</p>                                                                                                                                                                                                                                                                                                                                                                                              |
| 二十一 | Potential Energy & Conservative Forces | <p>Recognize that kinetic energy can be associated with a single object while potential energy is a property associated only with a system of interacting objects. Describe the factors that determine gravitational and elastic potential energy and calculate the potential energy of a system.<br/>Define mechanical energy and calculate the total mechanical energy of an object or system.<br/>Describe the transformations of energy that take place in a system in which mechanical energy is conserved.</p>                                                                                                                                                                                                                                                                            |
| 二十二 | Conservation of Energy                 | Explain the relationship between thermal energy and the temperature of an object.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|       |  |                                                                                                                                                                                                                                                                                                                                                                    |
|-------|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       |  | <p>Use energy diagrams (LOL) to track the energy transformations within a system, and the energy transfers between a system and its environment.</p> <p>Recognize that the work done by dissipative forces such as friction or drag results in changes in thermal energy, and calculate the changes in thermal energy, both internal and external to a system.</p> |
| 學習評量： |  |                                                                                                                                                                                                                                                                                                                                                                    |
| 備註：   |  |                                                                                                                                                                                                                                                                                                                                                                    |

| 學習目標：   | <p>Analyze rhetorical situations by explaining how writers' choices regarding audience, purpose, and context influence the effectiveness of their argument. Identify and explain claims and evidence in nonfiction texts, understanding how authors construct arguments and support them with relevant evidence. Write arguments with clear claims and supporting evidence, using logical reasoning and well-chosen examples to support assertions in argumentative essays. Evaluate reasoning and organization in written arguments, describing how an author develops and structures their ideas to advance their overall argument. Make strategic writing choices to address a rhetorical situation, ensuring that the purpose, audience, and tone are aligned throughout the writing process. Synthesize information from multiple sources to write an argumentative essay, integrating evidence from diverse texts while maintaining a clear line of reasoning.</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

Analyze the rhetorical situation, focusing on exigence, audience, and rhetorical strategies</p> <p>Work in groups to draft a paragraph analyzing one element of the rhetorical situation, using claim, evidence, and commentary. Peer-edit paragraphs and revise based on feedback.</p> <p>Complete the AP Classroom Personal Progress Check for Unit 1</p> |

|   |                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | Commentary                                                                  | <p>Use Groucho Marx' s letter, essays from Mengestu and Putnam, and excerpts from Maya Angelou and Frank McCourt to further analyze rhetorical strategies.</p> <p>Begin by reading The Crucible and background materials on the Salem Witch Trials. Discuss the causes and effects of characters' actions, focusing on how identity plays a role in their motivations</p> <p>Read "Arm Wrestling with My Father" by Brad Manning and "Gender in the Classroom" by Deborah Tannen. In groups, identify claims, evidence, and commentary</p>                                                                                                                                        |
| 三 | Unit 1: Author and Audience                                                 | <p>Continue reading The Crucible and read selections on identity. In groups, analyze the rhetorical situation, primary/secondary audiences, and structure of arguments in various articles</p> <p>Write a thesis statement based on one of the identity-related articles, ensuring it previews the structure of the argument</p> <p>Write a paragraph that demonstrates understanding of the audience' s beliefs, values, or needs, integrating claims, evidence, and commentary</p> <p>Analyze the use of rhetorical appeals (ethos, logos, pathos) in The Crucible and in articles, focusing on how they connect to the identity theme</p>                                      |
| 四 | Unit 2: Claim, Evidence and Commentary<br>Unit 3: Argument and Storytelling | <p>Complete the AP Classroom Personal Progress Check (MCQ and FRQ) for Unit 2. Submit a final thesis and paragraph analyzing claim, evidence, and commentary in one of the identity-themed texts.</p> <p>Discuss the rhetorical situation and structure in a final class reflection</p> <p>Read and annotate "The Case for Working with Your Hands" by Matthew Crawford. Identify claims, evidence, and commentary</p> <p>Students create a chart or short video explaining Crawford' s line of reasoning and how it supports his argument</p> <p>Write a thesis statement and paragraph analyzing the effect of Crawford' s arguments, using claim, evidence, and commentary</p> |
| 五 | Unit 3: Argument and Storytelling                                           | <p>Read President Roosevelt' s Fireside Chat #4 and "Dear Mrs. Roosevelt" by Robert Cohen. Discuss economic issues from the 1930s and compare them to issues faced by teens today.</p> <p>Research a current economic issue faced by youth today, finding a minimum of four sources, including one interview and one visual source.</p> <p>Develop an argument on the role of government in eliminating negative economic factors for teens, synthesizing at least three sources . Choose an appropriate method of development to</p>                                                                                                                                             |

|   |                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---|--------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                                                              | <p>present the argument</p> <p>Incorporate evidence from visual and interview sources into the essay. Focus on using clear reasoning and commentary to support claims</p> <p>Peer review and revise the synthesis essay to ensure the development of a strong line of reasoning</p> <p>Submit the final synthesis essay on the role of government in addressing economic issues for high school students.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 六 | Unit 4: Analysis                                             | <p>Read and annotate “The Serpents of Paradise” by Edward Abbey and “Where I Lived and What I Lived For” by Henry David Thoreau.</p> <p>Choose one text and identify the thesis, claims, evidence, and commentary. Write an analytical thesis statement that previews the structure of the argument using the Toulmin model</p> <p>Draft an introduction and conclusion for an essay on the chosen text, focusing on method of development</p> <p>Read a variety of texts on nature’s impact (e.g., Emerson’s Nature). Conduct interviews with classmates on how nature impacts their experiences. Share findings in class.</p> <p>Write an original Toulmin-type thesis statement about nature’s impact.</p> <p>Develop an introduction, write at least four paragraphs addressing argument and counterargument, and conclude with a well-crafted conclusion</p>                                                                                                 |
| 七 | Unit 4: Analysis Unit 5: Research, Claims and Citing Sources | <p>Complete the essay on nature’s impact on the individual, incorporating argument and counterargument with claims, evidence, and commentary</p> <p>Peer review the essays, focusing on rhetorical situation and organization.</p> <p>Revise essays based on feedback.</p> <p>Complete Personal Progress Check MCQ and FRQ for Unit 4 as additional practice.</p> <p>Begin by reading Hamlet. Focus on how ethical dilemmas drive the plot and character decisions. Annotate for themes of morality, personal vs. public ethics, and the consequences of actions.</p> <p>In groups, brainstorm ethical issues in professional and personal experiences (education, business, technology, medicine). Discuss how these categories relate to the play.</p> <p>Read Steven Pinker’s “Is the World Getting Better or Worse? A Look at the Numbers.” Analyze the line of reasoning and the text’s organization, focusing on how it supports the overarching thesis</p> |
| 八 | Unit 5: Research, Claims and Citing Sources                  | <p>Mark Pinker’s essay for word choice, comparisons, and syntax. Explain how these</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|    |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    |                                                        | <p>elements contribute to tone and style</p> <p>Conduct online research on contemporary ethical issues, narrowing down to a specific problem that requires a solution. Begin outlining articles for claim, evidence, commentary, and thesis development</p> <p>Begin drafting an argument paper synthesizing a minimum of three sources (one must be a visual) on the chosen ethical issue. Develop a thesis statement, introduction, line of reasoning, and commentary. Use transitions and stylistic choices to guide readers and convey tone</p> <p>Discuss outlines with peers, brainstorm counterarguments, and conference with the teacher after completing the first draft</p>                                                                                                                                                                                           |
| 九  | Unit 5: Research, Claims and Citing Sources            | <p>Focus on editing for language and syntax, incorporating feedback from peers and the teacher. Rewrite and refine the paper, focusing on clarity of reasoning and style</p> <p>Write a reflection on the writing process, addressing the metacognitive process, including challenges and areas of growth</p> <p>Submit the final synthesis research paper with properly documented sources</p> <p>Complete Personal Progress Check MCQ and FRQ for Unit 5 to reinforce skills learned during the unit.</p> <p>Reflect on how ethical reasoning and stylistic choices informed the research paper and how these skills apply to future writing projects.</p>                                                                                                                                                                                                                    |
| 十  | Unit 6: Style                                          | <p>Students choose one text from the list (e.g., “School” by Kyoko Mori, “Shanghai Schools’ Approach” by David Barboza, “I Know Why the Caged Bird Cannot Read” by Francine Prose). Annotate for claim, evidence, and commentary</p> <p>Write a thesis statement requiring proof and previewing the argument’ s structure. Develop 2-4 paragraphs analyzing the selection’ s style and organization, using claim, evidence, and commentary. Focus on stylistic choices in the writing.</p> <p>Read “Me Talk Pretty One Day” by David Sedaris and “Superman and Me” by Sherman Alexie. Compare and contrast their styles, focusing on diction, organization, comparisons, and syntax</p> <p>Write a comparison/contrast essay addressing the stylistic choices in each text. Use strategically chosen words, comparisons, and syntax to convey tone and style in the writing</p> |
| 十一 | Unit 6: Style Unit 7: Diction, Mechanics and Structure | <p>Peer review the comparison/contrast essays, focusing on claims, evidence, and style. Revise based on feedback</p> <p>Complete Personal Progress Check MCQ and FRQ for Unit 6.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| 十七  | Unit 10: Self-discovery | <p>Discuss the central themes of Siddhartha, including self-discovery, enlightenment, and the search for meaning. Introduce the novel's connection to personal growth and transformation, which parallels the process of self-reflection in college essays.</p> <p>Begin reading Siddhartha (Part I: "The Brahmin's Son" to "Among the Samanas"). Focus on Siddhartha's early quest for knowledge and his desire to transcend societal expectations.</p> <p>Students write a short personal reflection on a time they questioned or challenged their path in life, connecting this to the themes of self-discovery in Siddhartha.</p> <p>Continue reading Siddhartha, discussing how Siddhartha leaves behind traditional teachings in search of his own path.</p> <p>Explore the idea of personal journeys, spiritual quests, and the role of mentors. How does Siddhartha's decision to follow his own path reflect the need for independence and self-reliance in real life?</p> <p>Students draft an essay focusing on a transformative experience or a key moment of pers</p> |
| 十八  | Unit 10: Self-discovery | <p>Continue Siddhartha, focusing on Siddhartha's experiences with materialism, love, and ultimate disillusionment.</p> <p>Explore how Siddhartha's experiences with wealth, love, and material success reflect the struggle to find balance and meaning. Connect these themes to the pressures students face in their own lives and the search for their personal definition of success.</p> <p>Students revise their essays based on feedback, refining their personal stories of transformation and growth.</p> <p>Finish Siddhartha, and discuss how Siddhartha finally achieves enlightenment by the river.</p> <p>Discuss the conclusion of Siddhartha's journey and his realization of unity in all things. How does Siddhartha's ultimate enlightenment reflect the importance of personal reflection, acceptance, and understanding?</p> <p>Submit the final version of a college essay.</p>                                                                                                                                                                               |

| 學習目標：       | 1. Learn how to evaluate and graph the trigonometric functions, their inverse, and their reciprocals.<br>2. Use trigonometric ratios to solve problems in a variety of contexts, such as mechanics, biology, and navigation.<br>3. Learn strategies for simplifying expressions and solving equations by using trigonometric identities.<br>4. Learn how to apply trigonometry to oblique triangles, vectors, and complex numbers.<br>5. Introduce parametric and polar forms for writing and graphing equations.<br>6. Using polar coordinates to represent and solve problems.<br>7. Learn the polar form of complex number and De Moivre's THM<br>8. Vectors in Two Dimensions and Dot Product |                                                                                                                 |

| 學習目標：   | 1. Learn how to find trigonometric functions ratios of an acute angle by drawing a right triangle, and of any angle by drawing a unit circle and a reference angle.<br>2. Learn how to evaluate and graph the trigonometric functions, their inverses, and their reciprocals.<br>3. Learn strategies for simplifying expressions and solving equations by using trigonometric identities<br>4. Learn how to apply trigonometry to oblique triangles, vectors and complex numbers.<br>5. Introduce parametric and polar forms for writing and graphing equations.<br>6. Using polar coordinates to represent and solve problems.<br>7. Introduce the three-dimensional coordinate system and methods for describing three-dimensional vectors. |                                                                                                       |
| 教學大綱：   | 週次/序                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 單元/主題                                                                                                 |

| 學生圖像：   | 1.知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。、2.能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。、3.個性完善：愛心熱誠、誠信正直、自律自省。、4.群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。                                                                                                                                                                                                                           |                                                           |                                                                                                 |
| 學習目標：   | Through a spiraled curriculum, students will develop their Chinese language abilities in eight specific skill categories. Development of those skills will take place in the context of six thematic areas: Family and Community; Personal and Public Identity; Beauty and Aesthetics; Science and Technology; Contemporary Life; and Global Challenges. |                                                           |                                                                                                 |

| 學習目標：   | AP Studio Art 2-D is designed for students who are seriously interested in the practical experience of art. The AP program is based on the premise that college-level material can be taught successfully to secondary school students. This is a chance for the visually gifted to excel and receive recognition on a national scale. It allows students to compare their work with that of other high school students throughout the nation and helps them prepare an excellent portfolio for study at the college level. |                                                                                                                   |

| 學習目標：                                                                                                                                                                                                                                                | AP Computer Science A is a course designed to awaken and support students' problem-solving skills. The course will introduce the Java programming language while emphasizing universal language techniques like syntax, semantics and readability. While Java is the official AP CS A language, the concepts taught are applicable to any industry standard language such as Python, C++, C#, and JavaScript. Students will gain mastery in programming concepts by using a subset of Java features that are covered when needed throughout the course content. This allows the student to understand and master important concepts that will apply to programming problems in many additional languages. |                                               |

| 學習目標：   | This course provides you with the fundamental knowledge of and skills relating to environmental science that will help you succeed in life after secondary school. You will explore a range of topics, including the role of science in addressing contemporary environmental challenges; the impact of the environment on human health; sustainable agriculture and forestry; the reduction and management of waste; and the conservation of energy. You will increase your scientific and environmental literacy and examine the interrelationships between science, the environment, and society in a variety of areas. |                                         |

| 學生圖像：   | 1.知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。，2.能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。，3.個性完善：愛心熱誠、誠信正直、自律自省。，4.群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。，                                                                                          |                                                                                |
| 學習目標：   | Learn about the fundamental concepts of chemistry including structure and states of matter, intermolecular forces, and reactions. You'll do hands-on lab investigations and use chemical calculations to solve problems. |                                                                                |

內容綱要

The structure and chemical properties of water

The makeup and properties of macromolecules

The structure of DNA and RNA

Cellular components and functions of those components

Cell interaction with its environment

The cell membrane structure and function

Cell regulatory mechanisms like osmosis and selective permeability  
Cellular compartmentalization

Discussion and questions

The structure and function of enzymes

The role of energy in living systems

The processes of photosynthesis

The processes of cellular respiration

Molecular diversity and cellular response to environmental changes

The mechanisms of cell communication

Signal transduction

Cellular responses and feedback mechanisms  
Signal transduction

The events in a cell cycle

Questions and Discussions

| 學習目標：   | This course provides you with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. You will develop an understanding of the approaches and research methods used by social scientists. You will also be given opportunities to explore theories from a variety of perspectives, to conduct social science research, and to become familiar with current thinking on a range of issues within the three disciplines. |                                                         |

| 學生圖像：   | 1.知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。 , 2.能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。 , 3.個性完善：愛心熱誠、誠信正直、自律自省。 , 4.群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。 ,                                                                                                                                                                                                                                                                                                                           |                                  |
| 學習目標：   | This course focuses on marketing activities in the retail and service sectors. You will examine trends and global influences on marketing decisions, and will learn about the importance of customer service in developing a customer base and maintaining customer loyalty. Through hands-on learning, you will develop personal selling and information technology skills that will prepare you for a variety of marketing-related positions in the workplace. |                                  |

| 課程名稱：   | 中文名稱：物理辯論(上)                                                                                             |           |
|         | 英文名稱：Debates in Physics                                                                                  |           |
| 授課年段：   | 二上                                                                                                       | 學分總數：2    |
| 課程屬性：   | 實作(實驗)及探索體驗                                                                                              |           |
| 議題融入：   | 科技、資訊、閱讀素養                                                                                               |           |
| 師資來源：   | 外聘(其他)                                                                                                   |           |
| 課綱核心素養： | A自主行動：A2.系統思考與問題解決，A3.規劃執行與創新應變，                                                                         |           |
|         | B溝通互動：B1.符號運用與溝通表達，B2.科技資訊與媒體素養，                                                                         |           |
|         | C社會參與：C2.人際關係與團隊合作，                                                                                      |           |
| 學生圖像：   | 1.知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。，2.能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。，4.群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。， |           |
| 學習目標：   | 1. 能夠精確測量物理量<br>2. 能夠架設實驗裝置<br>3. 能夠自行設計實驗裝置<br>4. 培養完成科學報告的能力<br>5. 培養自主紀錄實驗過程的習慣                       |           |
| 教學大綱：   | 週次/序                                                                                                     | 單元/主題     |
|         | 一                                                                                                        | 文獻閱讀(一)   |
|         | 二                                                                                                        | 實驗架設(一)   |
|         | 三                                                                                                        | 實驗架設(二)   |
|         | 四                                                                                                        | 實驗架設(三)   |
|         | 五                                                                                                        | 實驗數據量測(一) |
|         | 六                                                                                                        | 實驗數據量測(二) |
|         | 七                                                                                                        | 實驗數據量測(三) |
|         | 八                                                                                                        | 數據處理(一)   |
|         | 九                                                                                                        | 文獻閱讀(二)   |
|         | 十                                                                                                        | 文獻閱讀(三)   |
|         | 十一                                                                                                       | 實驗架設(四)   |
|         | 十二                                                                                                       | 實驗架設(五)   |
|         | 十三                                                                                                       | 實驗架設(六)   |
|         | 十四                                                                                                       | 實驗數據量測(四) |
|         | 十五                                                                                                       | 實驗數據量測(五) |
|         | 內容綱要                                                                                                     |           |
|         | 確立主題後，選擇一題尋找相關文獻，包含：現象演示、現象的原理與解釋<br>製作文獻閱讀後的說明PPT                                                       |           |
|         | 從文獻閱讀中，選擇一篇並重現實驗。<br>架設實驗裝置並觀察現象。                                                                        |           |
|         | 架設實驗裝置並觀察現象。<br>改變實驗裝置中的物理量，並觀察該物理量對現象的影響。                                                               |           |
|         | 確認實驗現象的關鍵操縱變因。<br>改進實驗裝置，確認可以固定變因，並可量取應變變因。<br>製作實驗架設說明PPT。                                              |           |
|         | 改變操縱變因，並量取應變變因。                                                                                          |           |
|         | 改變操縱變因，並量取應變變因。                                                                                          |           |
|         | 改變操縱變因，並量取應變變因。                                                                                          |           |
|         | 找尋操縱變因與應變變因間的關係，利用曲線擬合表現出兩者間的數值關係。                                                                       |           |
|         | 尋找文獻，解釋變因間的數值關係與物理的關聯性。                                                                                  |           |
|         | 選擇另一題尋找相關文獻，包含：現象演示、現象的原理與解釋<br>製作文獻閱讀後的說明PPT                                                            |           |
|         | 從文獻閱讀中，選擇一篇並重現實驗。<br>架設實驗裝置並觀察現象。                                                                        |           |
|         | 架設實驗裝置並觀察現象。<br>改變實驗裝置中的物理量，並觀察該物理量對現象的影響。                                                               |           |
|         | 確認實驗現象的關鍵操縱變因。<br>改進實驗裝置，確認可以固定變因，並可量取應變變因。<br>製作實驗架設說明PPT。                                              |           |

| 學生圖像：       | 1.知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。，2.能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。，3.個性完善：愛心熱誠、誠信正直、自律自省。，4.群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。，                                                                                                                                                                                                                               |                                                                                                                                                                                                        |
| 學習目標：       | Global Issues embraces a multidisciplinary approach in understanding the increasingly complex questions confronting the world today. Understanding global problems is the initial stage towards conceiving globalized solutions. This course capitalizes and centers on the privileged position of the youth in their ability to passion a better generation. |                                                                                                                                                                                                        |

| 學習目標：       | This course emphasizes knowledge and skills that will enable you to understand media communication in the twenty-first century and to use media effectively and responsibly. Through analysing the forms and messages of a variety of media works and audience responses to them, and through creating your own media works, you will develop critical thinking skills, aesthetic and ethical judgement, and skills in viewing, representing, listening, speaking, reading, and writing. |                                                                                                   |

| 學生圖像：   | 1.知識堅實：知識運用、科技整合、思辨統整、文化美學、閱讀理解。 , 2.能力顯著：自主學習、數位科技、自我超越、問題解決、外語應用。 , 3.個性完善：愛心熱誠、誠信正直、自律自省。 , 4.群性鮮明：接納同理、社會公民、團體合作、文化洞察、方案執行、國際理解。 ,                                                                                                                                                                                                                                                                                                     |                                              |
| 學習目標：   | This course enables you to further develop your knowledge and skills in visual arts. You will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emerging technologies. You will use the critical analysis process when evaluating your own work and the work of others. |                                              |
